Effective October 12, 2022, the Krum Fire Marshal's Office will be utilizing third-party plan review services to supplement our plan review process. This process applies to new construction, remodels, shell finish-outs, and other projects that fall under the fire code. This process includes site plans, building/architectural plans, fire sprinkler plans, fire alarm plans, fire protection systems, and any other plans that pertain to the fire code. Please consult with our fire prevention office to determine that all plans are reviewed accordingly. Please submit your plans to one of the approved firms below. This will ensure that the plan review procedure is completed as quickly and efficiently as possible. The submitted plans must bear the stamp and signature of both the third-party review firm and the contractor's design professional. The contractor, owner, or designated agent must pay the third-party review fees and related expenses in full and directly to the third-party firm.

Steps for Plans Requiring 3rd Party Review:

STEP 1- Submit your plans to a selected third-party firm from our approved list (See Below).

STEP 2- Submit the following items to the Krum Fire Marshal's Office for plan approval and permit issuance.

- A completed Krum Fire Marshal's Permit Application (available at <https://www.krumfire.com/permits-inspections>)
- A completed contractor registration application.
- Copies of all state-issued licenses.
- Submit (2) paper copies and one (1) electronic copy (PDF) of reviewed plans, 3rd party reviewer notes, and all associated documents. Submitted plans shall bear the stamp and signature of both the third-party firm and the contractor's design professional.
- Send all documents to the Krum Fire Department located at 400 N First St. Krum, TX 76249, or email at kfdprevention@krumfire.com. If you need any assistance please call 940-482-6257.

STEP 3- After the required documents have been submitted in the appropriate format, the Krum Fire Marshal's Office will issue a permit after receiving, reviewing, and approving. A copy of the stamped approved plans and your permit will be emailed or available for pick up.

* Inspections will not be scheduled until all documentation requirements are satisfied. Please Note: The final fire and life safety inspection with the General Contractor shall not be scheduled until all related documents listed above are on file with the Krum Fire Marshal's office.
